No Prescription Necessary
Health Canada and FDA Approved

**FDA CLEARED**

30 Day Money Back Guarantee

We believe that healing through our body's natural ability should take priority over the use of medications and unnecessary surgeries.

**BENEFITS**
- Suppress Interleukin-1 (IL-1)
- Effective Osteoarthritis Treatment of The Knee and Back
- Dedicated Knee/back wraps with precise electrode placement
- Non Surgical Treatment without harmful medications
- Acts on pain receptors to reduce and eliminate pain and inflammation
- Alternative to Knee Replacement
- Helps Build Strength and enhances muscle function
- Simple 30 Minute daily treatment

**Conditions We Treat**
- OA of The Knee and Back
- Knee and Back Overuse
- Patella-Femoral Syndrome
- Athletic Injuries and recovery
- Ilio-Tibia Band
- Pre and Post ALC and Meniscus Recovery
- Hand and Foot Arthritis

**The Future of Knee Care**

The AcuKnee is a complete knee osteoarthritis treatment system utilizing the latest research and technology in precision electrotherapy. Intended for the treatment of knee overuse, knee pain and osteoarthritis of the knee. The AcuKnee was developed by a board certified Anesthesiologist and Pain Management Specialist. Our devices and treatment system have been extensively tested on knee OA patients, athletes and patients suffering from chronic joint and muscle dysfunction. Widely used by Orthopedic Surgeons, Physical Therapists, Athletic Trainers and Sports Medicine Specialists. Our modular treatment system allows for add-on accessories for treating a variety of joint, tendon and muscle ailments.

**The Only System of Its Kind.**

What Does AcuKnee Cost?

The AcuKnee is an FDA cleared Class II medical device based on a pre-programmed, modified TENS and NMES that has been approved for sale OTC without a prescription. The cost can be applied toward your health insurance plan deductible, paid for with HSA or FLEX spending accounts and in some cases reimbursed by your health insurance plan with a prescription from your provider. The AcuKnee system is a meaningful early and late alternative to knee replacement surgery and a highly effective treatment for knee osteoarthritis. We believe it is more effective than other forms of electrotherapy and neuromodulation or injection procedures. Our approach is based on the latest worldwide medical research on the long term relief of pain, reduction of inflammation and restoration and protection of the cartilage in the knee. As an alternative to knee replacement surgery, our results show early electrotherapy may prevent or slow additional joint damage and delay knee replacement, treatment of tendon injuries and enhance muscle recovery.

The Science

The AcuKnee system utilizes the latest research and technology in neuromodulation for treating pain associated with a variety of knee, back and muscle ailments. The AcuKnee treatment works by enhancing your body’s natural healing mechanisms to relieve pain and reduce inflammation. Using precise electrode placement and our proprietary PTI frequency timing and sequencing, the AcuKnee sends electrical impulses to the knee. These signals suppress interleukin-1 (IL-1), which is the cytokine responsible for regulating knee inflammatory responses. In addition, the AcuKnee releases endorphins, stimulates the peri-aquaductal grey area of the brain and eliminates pain.

AcuKnee patients, on average, experience an 82% reduction in pain based on the scoring results from the KOOS outcome test. Visit www.acuknee.com and take our KOOS test. In addition to providing immediate short and long-term pain relief, the AcuKnee will reduce swelling and inflammation. Our studies show AcuKnee will slow and halt the progression of knee osteoarthritis. AcuKnee is precision electrotherapy intended for the treatment of knee osteoarthritis, knee pain, tendon injuries, knee overuse and non-surgical athletic injuries. After nearly 3 years on the market, the AcuKnee system has less than a 3% return rate. We offer an industry leading 3-year warranty and a 30 day risk free trial.
